---

PROJECTS

Vans E-commerce Clone (In Progress)
- Developing a fully responsive replica of the Vans website using **React** and **Tailwind CSS**.
- Implementing **dynamic navigation**, **scroll-based animations**, and **interactive footer components**.
- Utilizing **React Hooks** (useState, useEffect) for **scroll detection** and **accordion menu functionality**.

Netflix Landing Page
- Recreated the **Netflix landing page** interface focusing on **layout structure**, **visual design**, and **user engagement**.
- Designed and implemented **hero sections**, **feature grids**, and **call-to-action components** using **HTML**, **CSS**, and **React**.

Finance Dashboard (Figma Design Implementation)
- Converted **Figma UI designs** into a fully functional **web application** with **pixel-perfect accuracy**.
- Built **data visualization components** and implemented a **responsive layout system** for seamless device compatibility.

Cloud Management Interface
- Developed a **cloud management dashboard** with intuitive and **user-friendly interface elements**.
- Created a **reusable component architecture** to enhance **scalability**, **maintainability**, and **code reusability**.
